

Spark A Fire

Danny Vera

I was arrested on the night we kissed
While walking back home alone
Guess I missed some things

I called you up in the morning
Guess where I've spent the night?
You thought I was sleeping around

Didn't we just spark a fire
Didn't we just light the night
Didn't we just start something, so beautiful

One of those summers nights you won't forget
We started foolin' around
Still doing that after 16 years

Through the good times and the bad
Loving you is all I ever had
But it's all I need to get by

Didn't we just spark a fire
Didn't we just light the night
Didn't we just start something, so beautiful

Didn't we just spark a fire
Didn't we just light the night
Didn't we just start something, so beautiful

Didn't we just spark a fire
Didn't we just light the night
Didn't we just start something, so beautiful

Didn't we just spark a fire
Didn't we just light the night
Didn't we just start something, so beautiful, so true
