Still Do

Danny Vera

It's dark and raining outside
On this lonely Sunday night
You're working still, with big tears in your eyes

You think the world has done you wrong
Just wait and love will come along
Then life will be much easier on you

So honey don't be scared
Just look at my evidence
I'm going to be there for you then

I still love you even when it's dark around me
I still love you even when you're mad at me

Every time that you are going home
You say you wanna be alone
And that you don't wanna see me no more

Now don't you act so tough
On this thing that you call love
Please smile and get along 'cause

I still love you even when it's dark around me
I still love you even when you're mad at me

When there are moments in your life
When you have given up and had enough
Just think of me and you will see that

I still love you even when it's dark around me
I still love you even when you're mad at me

I still love you when it's dark outside
