

Strange

Danny Vera

Strange, I believe I've known you're the one
Strange to know that in this life we'd meet
Strange that we won't be forever
And in time we're just a memory

But nights seem to last forever
On a road, where the lights slowly fade to green

Strange, we're just an imitation of a life that has already been

But I will love you till it's over
And I'll wait until we meet again

But strange, we won't be forever
And in time we're just a memory
