

# What Life Brings

Danny Vera

She was barely hanging on  
The love of her family kept her strong  
She was trying to survive  
Trail of death in her eyes

Two kids, a husband and a dog  
A minimum wage is rough enough  
They had fun and did alright  
They had each other and loved life

You don't know what life brings  
You don't know what it brings  
You don't know what until it's gone

Then somewhere around Christmas  
Santa brought his gifts but no one noticed  
'Cause the dark days were just right  
For the news that had arrived

They found a little knob inside her breast  
"Never saw a smaller one," is what they said  
A day of hospital, then move one  
You're young at heart and nothing's wrong

Flowers grew and one year passed  
Santa's time was here again  
And once again the doctor called  
"There's nothing we can do. That's all."

You don't know what life brings  
You don't know what it brings  
You don't know what until it's gone

You don't know what life brings  
You don't know what it brings  
You don't know what until it's gone

And then a perfect day in August  
She spread her wings and then took off  
They laid her body down to rest  
Next to her father is where she lies best

You don't know what life brings  
You don't know what it brings  
You don't know what until it's gone

You don't know what life brings  
You don't know what it brings  
You don't know what until it's gone
