

Face To Face

Dante Thomas

In this digital age
Fingers communicate
We listen with our eyes
Violence and sex on the screen
Who's dating who, it's crazy
How we live our life

I wish you the courage, courage
To interact face to face
I wish you the courage, courage
To interact face to face

Speaking face to face
Loving face to face
Being face to face
Face, face
Speaking face to face
Loving face to face
Being face to face
Face, face

You wanna escape
Create a new name
Where you can be who you like
Red pill or blue, it's the same
Most rather remain
Numb to the pain and blind

I wish you the courage, courage
To interact face to face
I wish you the courage, courage
To interact face to face

Speaking face to face
Loving face to face
Being face to face
Face, face
Speaking face to face
Loving face to face
Being face to face
Face, face
Speaking face to face
Loving face to face
Being face to face
Face, face
Speaking face to face
Loving face to face
Being face to face
Face, face
Speaking face to face
Loving face to face
Being face to face
Face, face
Speaking face to face

Nothing compares to being with you
Face to face, yeah that's the real thing

Speaking face to face
Loving face to face
Being face to face

Face, face
Speaking face to face
Loving face to face
Being face to face
Face, face
Speaking face to face
Loving face to face
Being face to face
Face, face
Speaking face to face
Loving face to face
Being face to face
Face, face
