

Every Time We Say Goodbye

Dare

This lonely road so far away
I count the hours turn to days
I call your name, you say hello
And you tell me things we only know
And you whisper softly, don't let go
And when I hurt, you ease my pain

And every time we say goodbye
You're still with me by my side
Like the stars above so high, so high
Every time we say goodbye

And when these days are hard to bear
I close my eyes and you are there
You take my hand and we dance again
You're on my mind, you're in my dreams
Down every road, cross every stream
And I'm so proud to be your friend

And every time we say goodbye
You're still with me by my side
Like the stars above so high, so high
Every time we say goodbye

I see when the seasons change
In every drop of falling rain
In the colours of rainbows
And every drop of falling snow

Every time we say goodbye
You're still with me by my side
As long as stars above still shine, still shine
Every time we say goodbye
