

Last Train

Dare

I caught the last train from the station, yeah
Where it goes, nobody knows...
There's a smile on the face of the old man, yeah
In his hands, I see his role

Where the eagle flies 'cross the water
I'll be with you again, woah

And I will be there
When the last train comes again
And I will be there (Will be there)
When the last train comes again

Someone tried to tell me this isn't living, oh yeah
As the smoke begins to fade
One day you'll light up the sky with your diamonds, oh yeah
Let it go, we'll find a way

Where the eagle flies 'cross the water
I'll be with you again, woah

And I will be there
When the last train comes again
And I will be there (Will be there)
When the last train brings me there

Follow our hearts, follow our dreams
And I'm coming home on the last train yeah

I'm coming home
On the last train yeah
On the last train yeah
I will be there
When the last train comes again
I will be there
When the last train comes again
