

## Runaway

Dare

Gonna stand on a mountain and shout out loud  
Gonna open your heart and sing  
And you're not going back to the sheltered wing  
Gonna push and you'll shove 'til you cross the line  
Gonna enter the race and win  
And you're not going back to the past you hide

Is there anything I can do for you?  
Is there nothing that you put me through?

You're running away and you don't know where you're running to  
You're running away  
You're running away from somebody else  
I can't see where you're running to  
Oh, runaway  
Run away from me  
She's just a little runaway

Gonna stand in a freeway and hitch a ride  
Gonna run 'til you reach the sky, yeah  
And you're looking for something  
I hope you find it

Is there anything I can do for you?  
Is there nothing that you put me through?

You're running away and you don't know where you're running to  
You're running away  
You're running away from somebody else  
I can't see where you're running to  
You're running away and you don't know where you're running to  
You're running away  
You're running away from somebody else  
I can't see where you're running to  
Oh runaway, runaway girl  
Runaway, runaway girl

You're running away and you don't know where you're running to  
You're running away  
You're running away from somebody else  
I can't see where you're running to  
...
