

# Was It My Fault

Darin

Ooh  
Was it my fault,  
Was it my fault, was it my fault

Was it my fault, was it my fault  
Was it what I did, it's like this I don't wanna be  
Was it my fault?

This is my something,  
I'm the original one, don't keep it up to me  
I'm just young and talented, I'm fladder but, Heey  
I must go on, and on and on.  
On stage, say heey, you know what I want

This is it, it is my faith  
Can't you go without don't keep arease with me  
I don't wanna see you fall  
Just listen to the sounds of my soul cry out, on your wall, (WALL)

Yeah

Was it my fault, was it my fault  
Was it what I did, it's like this I don't wanna be  
Was it my fault?  
X2

I really wanna be there to do what I came for  
And now we are just in broken pieces  
There are dark clouds over you, to understand what I'm feeling!

I wanna cry my life out and get away the pain  
That you left me and now it came a melody  
That comes from the soul

This is my something, don't bring me down  
'Cause I'll bite stite back with the sound of my pain  
And that so sad to handle 'cause I am the original one

Pick up one piece on the ground that you broke  
It made me sing from the soul  
Look what you did, you made everybody cry, over the sad soul

I love you comes straight from nothing,  
Because there's nothing left in my heart!

Was it my fault, was it my fault  
Was it what I did, it's like this I don't wanna be  
Was it my fault?

X2
