

Another Night With You

Darius Rucker

Here comes the sunrise
Like it always does
Always puts a damper on our kind of love
Just like last night
It always ends too soon
I know it's only daylight
But I wanna spend another night with you

Can't seem to make time stand still
It always does just what it will
So baby until
I can have a talk with that old moon
Oh and talk about a daylight
So I can spend another night with you

If I found a four leaf clover, I'd tuck it away
You know that I'd save it for a rainy day
If I had a genie in a bottle to make a wish come true
I'm telling you girl right now just what I'd do
Oh I wouldn't waste a minute
I'd only wish for one more night with you

But I can't seem to make time stand still
It always does just what it will
So baby until
I can have a talk with that old moon
Oh and talk about a daylight
So I can spend another night with you
Oh I'd talk about a daylight
So I can spend another night with you

Here comes the sunrise (Here comes the sunrise)
