

Girl In The Moon

Darius

How can I sleep tonight?
Tell me how mars survived
Fallen with stars -
She opened her arms...
Venus was in my sky.
How could it pass me by?
You silently served my time,
Even thru chains,
Rust and the rain -
You pulled away the tide...
Girl In The Moon,
I'm half-way there,
Girl In The Moon,
I see you everywhere...
Help me find a way of falling
Closer to you,
Girl In The Moon,
Girl In The Moon...
How could I weep tonight?
Touch and tears collide -
Gravity spins
Me into your wings,
And covers me in
your light...
[Chorus]
You're the silent silver
lining my cloud
You're the secret flame
That never burns out,

Pull away this veil

And rise into view

Girl in the moon...

[Chorus]
