

Your Ghost

Dark Divine

Disassociate
Try to soothe the pain going on inside my head
Disassociate
Try to soothe the pain
Even though it'll just happen again!

Mind games
Are all that we play
You're always infiltrating
Every thought inside of my brain!

I know that I'll be just fine
When I leave it all behind
But my head is full of regret
That I'll never forget until the day that I fucking!
Shh

I cannot escape
From your memory
Help me, help me
Help me not become the thing I hate!

It's where my demons hide
The voice behind my eyes
Showing me the things that haunt me most
Truth comes to light
As you twist the knife
Feel my hate escape and become your ghost!

This is not something we can do any longer
I'm all out of hope for both of us to recover
It would be so much better just to murder each other!

I cannot escape from your memory
Help me to find a way
Every time I wake up all I want to do is fucking forget!

It's where my demons hide
The voice behind my eyes
Showing me the things that haunt me most
Truth comes to light
As you twist the knife
Feel my hate escape and become your ghost!

Disassociate
Try to soothe the pain going on inside my head
Disassociate
Try to soothe the pain
Even though it'll just happen again!

It's where my demons lie...

It's where my demons hide
The voice behind my eyes
Showing me the things that haunt me most
Truth comes to light
As you twist the knife

Feel my hate escape and become your ghost!

This is not something we can do any longer

Both of us can't recover

It would be so much better just to murder each other!
