

# Nosferatu

## Dark Funeral

"Far beyond the shrouded gates  
At dawn I rest on ancient soil  
And through the endless halls then stray  
'Til darkness rules the world again"

I roam the misty roads at night  
I am the dream that made you fear the dark  
I am the wolf you'll never see  
When you wake up you'll be damned - just like me

While spreading my wings to hunt where there is no light  
I am the mist and the worms in your grave  
I am the terminal breath upon your neck  
And in your dreams you will be - dead like me

I am giving you death  
Your blood's my life  
I am the bringer of the disease, the Nosferatu

"The mind will drift between the worlds  
And be released from dismay and grief  
Then, as the lungs no longer breathe  
And when the soul is detached from the heart"

Feasting upon your sapid blood  
I am a wraith that haunts your very soul  
I am your darkest fantasies  
If you survive you'll be damned - just like me

I'm sinking my teeth to feed and blood gives me life  
I offer death and the end of your strife  
I am a merciless ghoul, a sinful beast  
And in your dreams you will be - dead like me

I am giving you death  
Your blood's my life  
I am the bringer of the disease, the Nosferatu

"From the ghastly grave and the tenebrous mist  
We maketh our glorious arrival  
For we are the superior seed of Belial

From the fields of the great Black Death  
From the greed of a scorched earth  
For the blood in your pulsating veins  
We have come, to rule the moonlit night
