

# Headache

Dark Lotus

I hear the words are spoken  
I think my mind is broken  
I keep on steadily smokin'  
Hopefully I die from choken  
Know what I was just thinking  
Maybe if I keep drinking  
The voice will quit and I can escape from this demon deacon  
My lifes a living hell  
Only the voice can tell  
Oh please oh christ compell  
Lead me from this evil spell  
My body won't stop shaking  
These voices keep on making  
Me do things to people, this must just be the work of satan

They want my mind an soul this shit is way out of control  
I haven't been to sleep in weeks, i'm sweating but my body's cold  
I'm shaking like a leaf, terrified to go to sleep  
Puking from the medication my vitals signs are looking weak  
I see him in the mirror, he told me come inside  
He lives inside my head so there's no where to hide  
They want my soul to die so they can come alive  
Possess my body, so everybody can realize

They say they'll give me pain  
They say they'll give me love  
They say they'll make me believe  
And tell me i'm above  
They take me down again  
This is my medicine  
I cut the head off the devil and I throw it at you!  
They say they'll give me pain  
They say they'll give me love  
They say they'll make me believe  
And tell me i'm above  
They take me down again  
This is my medicine  
I cut the head off the devil and I throw it at you!

I take so many zoloft  
I bleed my nose off  
I run up in a church and rip my fucking clothes off  
The demon follows me right to the house of God  
But then it swallows me and takes me to the Lotus Pod  
What can I do when my brains shakes my earth quakes  
My lips crack, my skin dries up and flakes  
Sleepless, 6 days of and peep this, I pin eyelids open, with rusty paperclips

The demons coming for me, they want to take my body  
Hands reaching up behind me suffocate the breath upon me  
They squeeze my vocal chords until I want to scream  
Call upon the dark lord please wake me from my dream  
I'm steady popin no-doze, I never want to sleep  
Mental pressure over comes the brain, the evil creeps  
Body shakes for me uncontroll I need to pop another pill  
Demons here to take my soul to late I need a refill

Spoken are the words  
In the hands of pythons  
Are the magic spells  
To unlock the keys to the universe  
It awaits, it will be summoned  
By the pedals of the lotus  
The night candles clean mind and soul  
Shall invoke the power

They say they'll give me pain  
They say they'll give me love  
They say they'll make me believe  
And tell me i'm above  
They take me down again  
This is my medicine  
I cut the head off the devil and I throw it at you!  
They say they'll give me pain  
They say they'll give me love  
They say they'll make me believe  
And tell me i'm above  
They take me down again  
This is my medicine  
I cut the head off the devil and I throw it at you!

I sit alone in the closet so I can hear what they saying  
I'm rocking back and forth helpless will it, infest my ahhhh  
My momma told me it would pass its been 17 days  
The bagck of the tylenol bottles don't say shit about a soul rape  
Tell me what the fuck I'm supposed to do now (how)  
Act how (now) go where (here) be with who listen more to me or you?  
Father tell me whenever will I be back to normal (never)  
I guess I'm cursed to live with this headache forever

Im hearing thoughts being wisperd screaming vioces from inside of my mind i  
wake up in a daze bloody scars on my arms i feel sick with someone elses mem  
orys they beg me to kill every thing i see, i got vissions of Nuns being rap  
ed by the barrels of guns a young lamb crusified for the fuck of it. it feel  
s me i cant sleep i cant eat i cant breath someone save me

I can't sleep at night  
Cause all these sounds in the darkness  
Wake up in a cold sweat  
Body feeling heartless  
Pop a couple sleeping pills to try an relax  
Every time I doze off something's breathing down my back  
Could it be the afterlife or just a soul living inside of me  
Praying for the day to take us both out of our misery  
Could it be the evil ways of past on friends?  
Or maybe all the lives I took are coming back for they revenge

They say they'll give me pain  
They say they'll give me love  
They say they'll make me believe  
And tell me i'm above  
They take me down again  
This is my medicine  
I cut the head off the devil and I throw it at you!  
They say they'll give me pain  
They say they'll give me love  
They say they'll make me believe  
And tell me i'm above  
They take me down again

This is my medicine  
I cut the head off the devil and I throw it at you!

Give me pain  
Give me love  
Make me bleed  
Take me above  
Take me down  
This is my medicine  
I cut the head of the devil and I throw it at you!

[repeats until song ends]
