

# Pirates

Dark Sarah

Quickly now into the shadows  
We should not make a sound  
The village swarms with people who guard their desert town  
I know there hides a vessel that can fly above the ground

You think they've seen us?  
No, but they will hear us if you keep on talking  
It is you who keeps on talking here  
Grr, you can be so annoying

Wait a while, someone's coming, you think they've seen us here?  
We're thieves in the desert of gods, they're everywhere  
Let's board the ship in darkness and hope that no one hears

Towards the sky!  
We're passing by!  
This is not real  
It is surreal  
Towards the sky this ship can fly  
I did not believe

Sail ahead  
The winds are mild  
Oh fly, oh fly the ark just might  
Take us right to where there is light  
Take us, the stars our guide!

Sail ahead  
The winds are mild  
Oh fly, oh fly the ark just might  
Take us right to where there is light  
Take us, the stars our guide!

This time it is not our fight  
But no longer we can hide

My mind's now playig tricks on me  
I think we're not alone  
There's an army of dead men near  
Their hearts are still as stone  
They're searching for something to release them from their loan

It's the key  
It's the key  
It waits for me

Sail ahead  
The winds are mild  
Oh fly, oh fly the ark just might  
Take us right to where there is light  
Take us, the stars our guide!

Sail ahead  
The winds are mild  
Oh fly, oh fly the ark just might  
Take us right to where there is light  
Take us, the stars our guide!

We're here to fight for our way!  
For our way through the gate!  
We're here to fight for our way!  
For our way through the gate!  
Death to the mortal!  
Death to the mortal!

For all this time  
I will fight, I will fight, I will fight!  
For all these times we all should fight  
We all should fight against the lie!  
For you I'll fight, you saved my life!  
We will fight, we will fight!  
We'll make it right what changed our lives!  
We will fight for what is right!

Sail ahead  
The winds are mild  
Oh fly, oh fly the ark just might  
Take us right to where there is light  
Take us, the stars our guide!

Sail ahead  
The winds are mild  
Oh fly, oh fly the ark just might  
Take us right to where there is light  
Take us, the stars our guide!  
Take us, the stars our guide!
