

Mighty Wings

The Darkness

Down goes the sun
The end has begun
A season with Eros
And my work is done

Out goes the fire
In comes the choir
Why must I live
When my dreams expire

God speed my friend
Open your mighty wings and fly
This is the end
The universe has brought you here
To die

Give me just a sip of your potion
Let me be a drop in the ocean

Ravens in flight
I bark and I bite
I am not man
I am dynamite

I am enraged
The beast is uncaged
Fire at will
Enemy engaged

God speed my friend
Open your mighty wings and fly
This is the end
The universe has brought you here
To die

Give me just a sip of your potion
Let me be a drop in the ocean

Open your mighty wings
And fly

God speed my friend
Open your mighty wings and fly
This is the end
The universe has brought you here
To die

Give me just a sip of your potion
Let me be a drop in the ocean
