

# My Only

The Darkness

The day that I met you  
On the side of the road  
I'll never forget you  
This much I know  
Have I told you lately  
It's hard for me to see  
How could I ever get so lucky?

When we're together  
My troubles fall away  
Whether it's forever  
Or just one more day  
As long as you're with me  
I'll tend your every need  
And the grass will never be this green again

When we're together  
We'll have our time in the sun  
When we're together  
For me, you're the only one

No need to hurry  
I know you're there  
No need for worry  
My life's not fair  
You know you'll always be  
My one and only  
My one and only

I know it hurts  
But I have to go  
Back to work  
To all I know  
There's nothing to fear  
I'll be back soon my dear  
Holding you in my arms again

When we're together  
We'll have our time in the sun  
When we're together  
For me, you're the only one

When we're together  
We'll have our time in the sun  
When we're together  
For me, you're the only one
