

You, me, the young Turks by the BU bridge
All of the lines are fixed
We need to remember what happens if
We don't ride into it

Time, look at the time
And what we used to be
Signs, what are the signs?
Nobody here still reads

I hear the eschaton
I see our stripes on floating ground
No matter what we've been
We are the upshot now
I hear the eschaton
I see our stripes on floating ground
No matter what we've been
We are the upshot now

They're making martyrs out of tennis stars
Did you think they were ours?
There's something in the water Byzantine
And everyone's down stream

Time, they all know the time
And what we used to be
Signs, look at the signs
Tell me what you believe

I hear the eschaton
I see our stripes on floating ground
No matter what we've been
We are the upshot now
I hear the eschaton
I see our stripes on floating ground
No matter what we've been
We are the upshot now
We are the upshot now

I hear the eschaton
I see our stripes on floating ground
No matter what we've been
We are the upshot now
I hear the eschaton
I see our stripes on floating ground
No matter what we've been
We are the upshot now
