It's About Time

Darrell Scott

Baby's asleep and the phone started ringing
Maybe it's time for a get away
Night is falling fireflies lighting
Sit on the front porch and drink lemonade
Mmmm come here baby tell me what you're thinking
Talk about your day talk about mine
We've been working so hard
Without needing attention
The clock on the walls say it's about time

Time is a feet taking stones and moment
Clinging to one another leaving no one behind
Take what you need best till tomorrow
Life is moving and it's about time
It's moving and it's about time

Isn't it hard time we try to lock up that room door
Let our eyes to turn the clock face down on the floor
Sometimes it feels like time is crawling
Sometimes we feel like a runaway train

Oh the time is a saint dancing hindu orlins
I'm taking a nap by a stringing man

Time is a feet taking stones and moment
Clinging to one another leaving no one behind
Take what you need best till tomorrow
Life is moving and it's about time
It's moving and it's about time
Time is a feet taking stones and moment
Clinging to one another leaving no one behind
Take what you need best till tomorrow
Life is moving and it's about time
It's moving and it's about time
It's moving and it's about time
It's about time

Keeping saving having needing
Taking giving and being on time
Oh you can miss where they go
Falls praying spending your time
Thinking about time
