

A Long Way

Darren Kiely

I look at myself
In the cold hard light of day
I try to find words
But I've got nothing to say
I wish every left I took turned right
But I'm running in circles without you by my side
Oh, it's a long way on your own
It's a long way

I've got lots on my plate
But no ounce of self-belief
And this jealous swelling rage
For a man I've tried to be

What if all we had
Were those final moments
Would we make it last
Would we try to hold it
And it hurts so bad to know
It's a long way on your own

I was scared of going home
Why don't you love it, it's so green
Like that boy I used to know
When he left, he had to leave
He wishes every left he took turned right
But he's running in circles without her by his side

What if all we had
Were those final moments
Would we make it last
Would we try to hold it
And it hurts so bad to know
It's a long way on your own

Oooh oh
Oooh oh
Oooh oh
Oooh oh

What if all we had
Were those final moments
Would we make it last
Would we try to hold it
And it hurts so bad to know
It's a long way on your own
It's a long way
