

# Can't Hold You

Darren Kiely

It's a freezing night, the streets are dead  
There's smoke coming from your breath  
Our hands are numb but only I feel something  
You drop your gaze and start to say  
Sometimes people in love can change  
Before you lie to ease the pain, I tell you one thing

God knows that I adore you  
There's nothing more I can give  
If I'm not the one for you  
Then darlin' maybe he is

'Cause I can't hold you  
The way I'd hoped to  
When your heart still beats for someone else's love  
Just say you're leaving  
And stop the bleeding  
'Cause we both know that I'll never be enough  
When your heart still beats for someone else's love

Is this how it's always been  
Did I ever measure up to him  
'Cause honestly, it's got me asking questions

Was I just someone to hold  
'Cause you didn't want to be alone  
And sometimes I wish I didn't

'Cause I can't hold you  
The way I'd hoped to  
When your heart still beats for someone else's love  
Just say you're leaving  
And stop the bleeding  
'Cause we both know that I'll never be enough

Oh, I thought you had let him go  
And that's why your blood ran cold  
I thought you had let him go  
But that's not why our love ran cold

'Cause I can't hold you  
The way I'd hoped to  
When your heart still beats for someone else's love  
Just say you're leaving  
And stop the bleeding  
'Cause we both know that I'll never be enough  
When your heart still beats for someone else's love  
Your heart still beats for someone else's love
