Melange Mining Co.

Darwin Deez

You've been trying to make me smile since September
The miners all remember
When you decided to go back down under the planet
Since then all I find is highrises
And rocks don't shine bright when you're used to them
If I could straighten up the flight right home to you soon

Then I'll have the weight of your arms around me
The weight of your arms around me
The weight of your arms around me
If I have the weight of your arms around me
Then I'd be fine
Hearts don't break up here, they just get weaker
Cause muscle's atrophy and fractional gravity
Now does it have to be four more weekends
Till we can hold each other close
That's one small step for a ghost
Just my only flashlight keep onto me

Till I have the weight of your arms around me
The weight of your arms around me
The weight of your arms around me
If I have the weight of your arms around me

It don't take much helium for one of them balloons
Don't see me soon, I'll get back to you
Ten tonnes of silicon, then I'm on the way
I'll see you soon and feel the weight

And I'll feel the weight
I'll feel the weight
The weight of your arms around me
The weight of your arms around me
The weight of your arms around me
If I had the weight of your arms around me
Then I'd be fine
