

Background Noise

Daryle Singletary

7-47, takin' wing
So low and loud that I can't hear myself think
Siren's blastin', fire engine's roar
It's like that until I walk through the door

Then you kiss me
Say you miss me
I surrender to the sound of your sweet voice
And everything else is just background noise

Brakes squealing' on an old City bus
My head's feelin' like it just might bust
Jackhammer's poundin', car alarms
All is quiet when I'm in your arms

Then you kiss me
Say you miss me
I surrender to the sound of your sweet voice
And everything else is just background noise

Our two hearts beating is all that I can hear
Your sweet I love yous' are music to my ears
Your slightest whispers come through loud and clear
And the whole world just disappears

Then you kiss me
Say you miss me
I surrender to the sound of your sweet voice
And everything else is just background noise
