"I get something real positive on them"

If you've noticed, there's been a lot of stuff comin' from, I guess the sewer lately

You know I guess, I dunno... A lot of artificial sewage runnin' out around here...

You take it as how you wanna take it... but you know where it originated...

When we first came out, there's like, a lot of people axed us this question...

That our style is so different that like aren't you afraid of Ya know people comin' out and imitatatin' your style and things like that

And um, we said ya know yeah we mind, but at the same time we take it as a compliment...

You know what I mean?... because I guess you know when somethin'g's that good people just feed off of it

I guess whether they want to or not... but then lately some people have just been taking the whole image

And everything too far... and they know who they are, who they be...

But that's cool though, everybody knows who started this thing.
