

Winter

Daughter

Drifting apart like 2 sheets of ice my love
Frozen hearts growing colder with time
There's no heat from our mouths
Please take me back to my rich youth

And we were in flames,
I needed I needed you
To run through my veins
Like disease, disease
And now we are strange, strangers

It's different now
Gray faced
Eyes burnt out
Flames are gone
Gloves are on
I have a feeling
Love's gone back
Went to the cinema
Losing our minds
Comic fever, shutting confined spaces
Lost in the dark , my heart taken
Resting on your heart

And we were in flames,
I needed I needed you
To run through my veins
Like disease, disease
And now we are strange, strangers

Wait for me to
Degrade before
You go caring
Pray for waste of
Day light speaks when
Sun burns keeping
Undeveloped
Out of revenge
And degrading
My youth and stained on our sheets
It's on a piece of me
It's on a piece of me

A winter comes
A winter crush all
I've heard things that
I once loved
Winter comes
Winter crush all
I've heard things that
I once had
