Cheap Camaro

Dave Barnes

I think the moon was shining green that night
Something like a cosmic traffic light
Telling us to go
But we didn't know where
Ooh but it felt right

Every night we were running down a dream
Every star was a spotlight on you and me
Every thought was a possibility

We were burning
Circles around this town
Looking for something
Something we never found
I told you I would never let you go
I guess it shows how much I didn't know
Riding in that cheap Camaro

I swear your eyes were twice as blue that night
Diamonds cutting through the twilight
Telling me to go
How was I to know where
Ah but it felt right

Every night we were running down a dream
Every star was a spotlight on you and me
Every thought was a possibility

We were burning
Circles around this town
Looking for something
Something we never found
I told you I would never let you go
I guess it shows how much I didn't know
Riding in that cheap Camaro
