

Then There Was Love

Dave Barnes

There was lonely there was blue
There was was going through the motions
There was take out with my friends
There were nights all by myself

All those arrows missing marks
One or two shots in the dark
There was nothing really wrong at all
There was good with being fine
That was right before I found you

Then there was love... love, love
There was love... love
Then there was love

There was love, there was love, there was love

There were get together plans
There were party conversations
There was sister checking in
There was I'm still doing fine

There were nights out after work
One or two could it be hers
Maybe I'd be better off without it
There was cool with being fine
That was me before I found you

Then there was love... love, love
There was love... love
Then there was love

There were ruts I got myself into
There were parts of me I never knew
Until there was you

There was love, there was love, there was love

Then there was love... love, love
There was love... love
Then there was love
