

# Fly On

Dave Days

I'll build a spaceship fly off of this blue dot  
Look out the window wave goodbye to a world so lost  
I know there's something out there the more I look up I stare  
Do you have eyes starlit skies should I even care  
But I do and I'll go I'll tell the tales of home  
You might not understand but at least you'll know you're not al  
one

Not alone not alone  
You might not understand but at least you'll know you're not al  
one  
Not alone not alone  
You might not understand but at least you'll know you're not al  
one  
Not alone not alone

Fly on  
You've got no worries out there but to fly on  
You'll be discovered one day and we'll be gone  
Rewind the memories and replay our song  
This world is bound to ignite but you'll fly on

But you'll fly on

It's getting darker growing older every day  
Been holding this gold record that I brought for you to play  
I wonder if the world I lived is still inhabited  
Because we can't agree this land of free we'll fight till we do  
n't exist  
And if it's true and I run into you  
I'll know the reason why must be the same as mine

All alone all alone  
Didn't quite work out at home now you're out here all alone  
All alone all alone  
Didn't quite work out at home now you're out here all alone  
All alone

Fly on  
You've got no worries out there but to fly on  
You'll be discovered one day and we'll be gone  
Rewind the memories and replay our song  
This world is bound to ignite but you'll fly on

But you'll fly on  
But you'll fly on  
But you'll fly on
