

# I Never Left You

Dave Dobbyn

You struggled  
You made a fist of your youth  
And in the days before your latest great designs  
You got yours  
Succeeded most of half the time  
And there were days  
When all the breaks flew you by  
No sense you following the best laid plans  
Things done in earnest never got to stand  
Ain't it amazing just how everything changes  
When the world takes two steps backwards  
Backwards

There's no emotion in a world without you  
And I never left you  
With my devotions like a light inside you  
And I'll never let you down

You want it  
You need to justify your times  
And there'll be days when all the crazies take the prize  
When the Garden of Eden's dust is blown away  
We'll be waiting at the gate to do the time  
No sense in following the best laid plans  
Things done in earnest never get to stand  
Hey it's amazing just how everything changes  
When the world takes a few steps backwards  
Backwards

There's no emotion in a world without you  
And I never left you  
With my devotion like a light inside you  
And I'll never let you down

You know I hope it springs eternal  
From the faces of these angels here  
I can't let you  
Down into the dungeons of a life lived under fear and pleading  
I can't let you go

There's no emotion in a world without you  
And I never left you  
With my devotion like a light inside you  
And I'll never let you down  
By the light of the moon our love alone to hide you  
And I'll never let you down
