

## Drastic

Dave Hause

So what once seemed so drastic is now commonplace  
They're driving machines down the lines on our face  
There's no shame, there's no mercy, not even a trace  
With our bombs and our pills we think we've made things safe

Maybe we'd be better off with our heads in the sand  
They could leave us to drown here according to plan  
If this ships going down you'll find me with the band

Cause they've pushed us all right to the edge  
We're on the brink  
They've pushed us all right to the edge

They're claiming the answer is kill or be killed  
While we're dying of cancer and paying our bills  
We just drown in this quagmire of what we've been told  
While they're cashing the checks on the faith that we sold

Maybe we'd be better off with our heads in the sand  
They could leave us to drown here according to plan  
If this ships going down you'll find me with the band

If this ships going down you'll find me with the band  
If this ships going down you'll find me with the band  
If this ships going down you'll find me with the band

Cause they've pushed us all right to the edge  
We're on the brink  
They've pushed us all right to the edge  
They've pushed us all right to the edge  
We're on the brink  
They've pushed us all right to the edge

They've left us out here on this ledge  
We're on the brink  
They've pushed us all, pushed us all  
Pushed us all right to the edge
