

# Geometry

Dave Hollister

You make it hard for me  
To concentrate  
I get stuck on your masterpiece  
Your geometry  
Every angle, baby  
You're 360, every curve  
Light a candle, honey  
'Cause tonight I wanna learn

The way your body set up  
You could bring a brother to his knees  
Oh, baby  
Whatever your mama fed you  
Served you well from your head to your feet  
Oh, baby

You got me like, oh my God  
Girl, what you're doing  
Don't stop now  
Your legs, your hips, them thighs  
Glad they're only for my eyes now  
It ain't easy 1, 2, 3  
You make it difficult for me  
To look at you and stay on track  
Just want you to know that

You make it hard for me  
To concentrate  
I get stuck on your masterpiece  
Your geometry  
Every angle, baby  
You're 360, every curve  
Light a candle honey  
'Cause tonight I wanna learn

You're a welcome distraction  
Love when you interrupt me  
Wearing the latest fashions  
Now my mind's on your body  
You bring me up from down  
Turn the silence to sound  
Girl, you're amazing  
How do you do it?  
How? Tell me, baby

You got me like, oh my God  
Girl, what you're doing  
Don't stop now  
Your legs, your hips, them thighs  
Glad they're only for my eyes now  
It ain't easy 1, 2, 3  
You make it difficult for me  
To look at you and stay on track  
Just want you to know that  
You make it hard for me  
To concentrate  
I get stuck on your masterpiece

Your geometry

Your measurements

Are supporting evidence

That you came from above

Turn me up, I'm in love

I wanna learn every way

The twists and turns your body takes

To get me there

Oh, I swear

You make it hard for me

Baby, hard on me, yeah

What you do to me, baby

Baby

You're a beautiful distraction

Yes, you are
