

I'll always love you
I will till the day that I die

You broke your promise
And left me alone with a lie

I'll never hurt you
You said that so many times, so many times

Maybe the bottle's the answer
Well it hasn't helped much this time

You just can't hide
A love that has died
But I've buried it
Deep in my mind

I'll always love you
I will till the day that I die

You broke your promise
And left me alone with a lie

But I'll never hurt you
You said that so many times, so many times

There's nothing left but your memory
That's all that matters sometimes
That can't go on, I'm not that strong
Maybe you're losing your mind

I'll always love you
I will till the day that I die

You broke your promise
You left me alone with a lie

But I'll never hurt you
Honey, you said that so many times, so many times

I'm hearing voices inside me
You're probably crazy by now

No, leave me alone, I can't go on
You'll learn to make it somehow

I'll always love you
I will till the day that I die

You broke your promise
And left me alone with a lie

But I'll never hurt you
You said that so many times, so many times
And I'm hearing voices inside me
