Shine a Light

David Archuleta

There is a beacon
You might not see the light on
Look up ahead
'Cause somebody has the light on
And you might not know
It's leading you home

So many faces
Thousands of places you'll go
You can lose faith
Or run out of strength
Oh, I know
But don't give up hope
Don't give up hope

Shine a light
Shine a light on your problems
Don't let the worries ever bring you down
Look up ahead
You're gonna stop 'em
The good is never gone
It's the dark before the dawn
Shine the light
(Shine a light, look up ahead now)
(Shine a light, look up ahead now)

You're gonna fall
But that isn't all your story
Some day you'll rise
Then you'll realize
There's more you don't understand
And holding our hands, yeah yeah

Shine a light
Shine a light on your problems
Don't let the worries ever bring you down
Look up ahead
You're gonna stop 'em
The good is never gone
It's the dark before the dawn
Shine the light

You can shine a light, see that sun peak out
It's burning bright, never gonna hide it all
When it gets hard to look into yourself
And see who you are, there's a fire that's burning in you
You can shine a light, see that sun peak out
It's burning bright, never gonna hide it all
When it gets hard to look into yourself
And see who you are, cause there's a light shining in you

Shine a light on your problems
Don't let the worries ever bring you down
So look up ahead
You're gonna solve 'em, yeah
The good is never gone
It's the dark before the dawn

Shine a light
Shine a light on your problems
Don't let the worries ever bring you down
Look up ahead
You're gonna solve 'em
The good is never gone
It's the dark before the dawn
Shine the light

You can shine a light, see that sun peak out
It's burning bright, never gonna hide it all
When it gets hard to look into yourself
And see who you are, there's a fire that's burning in you
You can shine a light, see that sun peak out
It's burning bright, never gonna hide it all
When it gets hard to look into yourself
And see who you are, cause there's a light shining in you
