When I live my dream, I'll take you with me Riding on a golden horse We'll live within my castle, with people there to serve you

Happy at the sound of your voice

Baby, I'll slay a dragon for you Or banish wicked giants from the land But you will find, that nothing in my dream can hurt you We will only love each other as forever

When I live my dream When I live my dream, I'll forgive the things you've told me

And the empty man you left behind It's a broken heart that dreams, it's a broken heart you left me

Only love can live in my dream
I'll wish, and the thunder clouds will vanish

Wish, and the storm will fade away
Wish again, and you will stand before me while the sky will pai
nt an ouverture
And trees will play the rhythm of my dream

When I live my dream, please be there to meet me

Let me be the one to understand
When I live my dream, I'll forget the hurt you gave
Then we can live in our new land
Till the day my dream cascades around me
I'm content to let you pass me by
Till that day, you'll run to many other men
But let them know it's just for now
Tell them that I've got a dream
And tell them you're the starring role
Tell them I'm a dreaming kind of guy
And I'm going to make my dream
Tell them I will live my dream
Tell them they can laugh at me
But don't forget your date with me
When I live my dream
