

## Don't Forget

David Choi

The clouds floating in the ocean sky  
Your dress slowly imitates the waves  
To think back from now to where we've come today  
You're the same perfect girl in every way

I'll take care of you, live out every dream we've shared  
We'd make a perfect family  
And nothing else matters when we're both together  
I don't want to wake up from this dream

Please don't forget me  
Don't forget the way we used to dance like that  
Me, it was always me  
I think I'd better leave again from all I had

Mixtapes, we stayed up late  
Your tears now they celebrate  
They're playing songs I thought we used to hate  
You're his, he's yours  
Our story comes to close  
See your type forever in gold

Oh I should run away  
Oh I should run away  
Oh I should run away  
From you

Oh please don't forget me  
Don't forget the way we used to dance like that  
Me, it was always me  
I think I'd better leave again from all I had

Please don't forget me  
Don't forget the way we used to dance like that  
Me, it was always me  
I think I'd better leave again from all I had
