

# Firing Squad

David Cook

This is our manifesto  
We've given all the best to you  
Like it was the least that we could ever do  
We're soaked in gasoline while  
You watched as everything just burned  
Letting your lighter do the dirty work

You better hold your ground  
The end is starting now  
So load your gun  
A war is coming

We are all  
Against the wall  
Won't be the ones that time forgot  
If it's our fate  
We're not afraid  
Oh we can face your firing squad

This is our revolution  
Too late for absolution now  
Nothing could ever put this fire out  
The calm before crescendo  
The quiet night before the storm  
Do you remember what you're fighting for?

You've covered our eyes in blindfolds  
But light always finds its way back in  
So go on and raise you rifles  
And fire... fire... fire...

We are all  
Against the wall  
Won't be the ones that time forgot  
We'll wear the stars  
Like battle scars  
So give us everything you got  
If it's our fate  
We're not afraid  
Oh we can face your firing squad
