

Make A Move

David Cook

When we were young and dumb and free
And the world was spinning at our feet
And anything was possible
Watch it run, break up the steam
In the back seat, salt and body heat
We had everything in hand
Punch drunk and all part of the plan
The sound the fury and her face
Invincible we had it made
Now watch it fade

Down and out
Trying to get out of this one light town
Chasing pavement to make your parents proud
What's it gonna be for you?
That old highway
So just make a move

Dancing close and moving slow
Getting high to keep it low
The night felt like it couldn't end
The headlights lighting up the way
To that memory we stashed away
We had that city in our hand
Punch drunk and stuck without a plan
That sound still ringing in my ears
We held on to our better years
With nothing left to fear

Down and out
Trying to get out of this one light town
Chasing pavement to make your parents proud
What's it gonna be for you?
That old highway
Keeps screaming at you, honey, make or break
That neon heart of yours can light your way
So just make a move
So just make a move

We keep chasing the dream
But the dream keeps running faster, faster
It was all make believe
Happy ever after

When we were young and dumb and free
And the world was spinning at our feet

Down and out
Trying to get out of this one light town
Chasing pavement to make your parents proud
What's it gonna be for you?
That old highway
Keeps screaming at you, honey, make or break
That neon heart of yours can light your way
So just make a move
So just make a move
