

# Where Do We Go

David Cook

We're counting circles  
Around and around until we're down on the floor  
What were we put here for?  
We keep on burning  
A hole in the ground  
We're reaching out for more  
Can't see the fight in the war

If the light leaves our heart  
Do we know where to start?

Whenever the sun goes down  
Where do we go?  
When all of the leaves turn brown  
Where do we go?  
With every step that we're taking to the brink  
We're cutting ties like a puppet from a string  
So whether we're lost or found  
Where do we go?

Before the sky falls  
From Heaven to ground  
We've got to run for our lives  
Inside of innocent eyes  
But when the night calls  
We're tearing it down  
Until the smoke can rise  
We are the warning signs

When the light leaves our heart  
Will we know where to start?

Whenever the sun goes down  
Where do we go?  
When all of the leaves turn brown  
Where do we go?  
With every step that we're taking to the brink  
We're cutting ties like a puppet from a string  
So whether we're lost or found  
Where do we go?

By the time the music starts we'll fade away  
We'll be in the trenches making our escape  
Chasing fireflies like bullets to the brain

When the light leaves our heart  
Will we know where to start?

Whenever the sun goes down  
Where do we go?  
When all of the leaves turn brown  
Where do we go?  
With every step that we're taking to the brink  
We're cutting ties like a puppet from a string  
So whether we're lost or found  
Where do we go?

Wherever you go  
Oooh, oooh
