

Other Half Rule

David Crosby

We were close once
To the end
Two blind men
Fat fingers on the trigger
Rocket Man and Little Hands
Never takin' time to listen
Blockin' out half the lie
Only sabotages the mission

Take me in
Hold me in your arms again
Save me from myself
Let it out
All the things you never spoke about
Move aside
While the other half rule

Ego is the fever
Runs hot and makes 'em blind
Fuel for the fire
It burns a man alive
It's time to turn the tide
Boys, sit back and let the other half drive

Take us in
Hold us in your arms again
Save us from ourselves
Let 'em out
(Let 'em out, let 'em out)
All the things you couldn't speak about
(All the things you couldn't speak about)
Move aside (ooh, ooh)
While the other half rule

(While, while the other, the other, rule, the other half rule)
(The other half rule, while the other, the other, the half rule
, the other half rule)
(The other half rule, the other half rule, while the other, oth
er, rule)
(The other half rule, the other half rule, while the other, oth
er, the other half)
(Rule, the other half rule)
