

The Other Side Of Midnight

David Crosby

I had a dream just the other day
All the stars showed up in a different place
She took my hand as the Heavens want
Said, "Nothing starts 'til the work is done"
A faint light shone in her eyes
I wasn't frozen or petrified
We started counting out galaxies
While we sailed across the sea

How does the love light shine
From so high above?
Tell me
How does the love light shine
From so high above?
Tell me

In one moment, my pain was healed
The other side of midnight is real
With one touch, I knew the world was right
On the other side of midnight

In my confusion, I would devise
To stay up 'til dawn, lights up the sky
The music of her voice still filled my ears
While the red earth consumed my tears

How does the love light shine
From so high above?
Tell me
How does the love light shine
From so high above?
Tell me
How does the love light shine
From so high above?
Tell me
