

Together Alone

David Dunn

What is it about me
I'm stuck inside a daydream
It's feeling like a brain freeze

So does it even matter
What I'm really after
Feels like a disaster

What's the difference between me and me

Do I really even know who I am
Or am I stuck inside some digital land
Where everybody goes
To be together alone
Do I even wanna find the real thing
Cause I look happier inside of this screen
Where everybody goes
To be together alone

So maybe I'm in danger
The validation of these strangers
Is slowly taking over me

And I can still remember
The days when my endeavors
Were free from the need to be seen

Oh no

Do I really even know who I am
Or am I stuck inside some digital land
Where everybody goes
To be together alone
Do I even wanna find the real thing
Cause I look happier inside of this screen
Where everybody goes
To be together alone

I get lost in the sky
Skin and bones, heart and mind
All the big things
All the big dreams
I wanted everything
Who am I supposed to be
Myself or someone on a screen

Do I really even know who I am
Or am I stuck inside some digital land
Where everybody goes
To be together alone
Do I even wanna find the real thing
Cause I look happier inside of this screen
Where everybody goes
To be together alone

I get lost in the sky
Skin and bones, heart and mind
