

This Must Be Love

David Foster

What is this look I often see
faces filled with ecstasy
what's going 'round,tell me what have they found
I've been searchin' for the answer
trying to work my feelings out
I been up all night,girl
nothing is goin' right

Since we met I've had some problems
with words I couldn't say
now you've changed my life forever

Chorus:

This must be love
the one I heard about
no other kind of feeling
turns me inside out
Yes this must be love
controlling my heart and mind
let's take a vow to make it last
'til the end of time,'til the end of time.

It's a strange sensation,a new creation
and I just don't have a defense against it
I'm completely outdone
for the first time there's only one
the things I did,I don't do no more
there's no desire,no looking for
who or what is to blame
no it cannot be explained
since we've met I've had some problems
with words I couldn't say
now you've changed my life forever

-Repeat Chorus-

Bridge:

Something's come over me
you're all my eyes can see
whatever it may be

-Repeat Chorus-
