Delirious

David Guetta

Seems to me like the days are getting longer For everyone there's no fun when there's no time to sleep Working on and on for a day in the sun Counting down the days till it stops

Can you hear us, watch the sun on my skin? And the world that I'm in makes me delirious Can you hear us with a smile on my face? On a far different place I'm delirious

Can you hear us, watch the sun on my skin? And the world that I'm in makes me delirious Can you hear us with a smile on my face? On a far different place I'm delirious

Take me away, make me a holiday Delirious Take me away, make me a holiday Delirious

Under the sun I feel I'm getting stronger Time to rewind my mind, recharge my batteries 'Cause it takes so long and too soon it's gone Holding back the days to my reality

Take me away, make me a holiday Take me away, make me a holiday Delirious

Can you hear us, watch the sun on my skin? And the world that I'm in makes me delirious Can you hear us with a smile on my face? On a far different place I'm delirious

Can you hear us, watch the sun on my skin? And the world that I'm in makes me delirious Can you hear us with a smile on my face? On a far different place I'm delirious

Take me away, make me a holiday Delirious Take me away, make me a holiday Delirious

Can you hear us, watch the sun on my skin? And the world that I'm in makes me delirious Can you hear us with a smile on my face? On a far different place I'm delirious

Can you hear us, watch the sun on my skin? And the world that I'm in makes me delirious Can you hear us with a smile on my face? On a far different place I'm delirious
