

## Lovers in Orbit

David Hodges

My love  
There was only two of us  
Finding out what we were made of  
Even If it takes a million years  
A thousand dreams  
To get you here  
Here with me  
My love  
Oh we are flashes in the sky  
Just seconds of an endless time  
But none of that can change what we have  
What it means  
That you're here  
Here with me  
Planets in motion we were reckless  
Lost in the stars we were burning bright  
Like lovers in orbit  
We were falling  
My love  
Oh I have been the lonely kind  
But you have made this world alive  
'Cause every little word that you say  
Is gravity pulling me to you and you to me  
Planets in motion we were reckless  
Lost in the stars we were burning bright  
Like lovers in orbit  
We were falling down  
So fast  
This love  
Will keep us off the ground  
Some way  
Some how  
We keep on falling  
Planets in motion we were reckless  
Lost in the stars we were burning bright  
Like lovers in orbit  
We were falling
