

Comes In Waves

Dawes

A boy that grows up in a beach town
And never learns to surf
Sounds like the perfect distillation
Of my time spent here on Earth
But I have stared at the horizon
With both feet in the sand
The thing I love about the ocean

It comes in waves
Waves

I've been feeling like a light bulb
When the filament won't glow
Surrounded by a darkness
Cause the current's moving slow
Am I losing my intensity
Is that feeling here to stay
But that's the thing 'bout electricity

It comes in waves
Waves

I think I've found something in common
With nothingness and God
You stare at either in the face too long
They'll do each other's job
Sometimes those silences are holy
Sometimes I'm drifting into space
But if the spirit's moving through me

It comes in waves
It comes in waves

I think their grip is getting looser
I think they're giving us a try
If you feel good about the future
Then baby so do I
Let's keep an eye on all our enemies
While we're popping the champagne
Cause that's the thing about a victory

It comes in waves (It comes in waves)
It comes in waves (It comes in waves)
It comes in waves (It comes in waves)
It comes in waves (It comes in waves)
