

# We're All Gonna Die

Dawes

Hey kid at the show tonight..  
The face beyond the barricade  
How ya dance and ya sing to every single line  
Like it was you up on that stage

I mean to know your secret  
I'm asking you for help  
How do I fall in love with anything  
Like you seem to do so well?  
I gotta get back to when it came out  
The way it was supposed to sound  
Before money was ever changing hands  
And my feet were on the ground

When I could feel the wind's direction  
When I knew what songs to sing

And he said, "Try not to get upset  
Let it all go by  
Because how can it be that bad  
If we're all gonna die?"

So I started to think about  
That girl that disappeared  
And if really was the road that pulled me away  
Or if I'm still a victim of my fears

As she showed me, the machine ran  
That our words protect us from  
How she could keep me in the moment  
How that's all there ever was

As she called, I asked to see her  
Even if it's just a couple days  
I could meet her out in Georgia  
She could fly out to LA

And if the plane goes down on her way to me  
I think I know how she would react

She'd smile and close her eyes..  
Think about her life..  
While some voice screaming in the back  
"We're all gonna die."

So try not to get upset  
Everything is fine  
Hey, it's not that big a deal  
We're all gonna die
