

Miles

Dawn Richard

Feel the flame in my heart start to flicker
Need you there to save it from burning out
They say true love should never separate
I know it hurts, it's better than
Tears are only as a holdup before the wind
Are you just too far to notice?
Look it, usually for miles apart
Funny, no where but away from your heart
No where but away from your heart
No where but away from your heart

The further we move from the sun
Changing with the seasons
Now it's cold, we're buried in snow
Love couldn't find us cause the roads are blocked
Too far to get us out, oh-oh-oh

Tears are only as a holdup before the wind
Are you just too far to notice?
Look it, usually for miles aá¹-art
Funny, no where but away from your heart
No where but away from your heart
No where but away from your heart
No where but away from your heart
No where but away from your heart
No where but away from your heart
