

Save Me From U

Dawn Richard

It's a mystery, how no ones figured you out
When it gets too deep, you just let me drown, yea
Who needs a enemy, when the one you love is tearing you down
And dragging you into the ground

I'm tired of waiting, I'm tired of calling
Only for you to let me down
My heart is vacant, no more tears falling
From here and out I've made a vow, I don't need no...

I don't need no rescue from no falling plane
Savior from a building going up in flames
So baby before you go put on your cape
Save me from you

Don't know the man behind the mask identity
Cause your the only hero I know that can be
Saving everyone but keep on hurting me
Save me from you

My hearts on my sleeve, everytime you come around
When have the key, you choose to shut me out

How can you be superman, with an "S" on your chest
When everytime I need you first, I seem to be always be last
I know that signals in the sky, so your nowhere to be found

I don't need your protection from danger
I don't need you to shoo me from harm
I don't need you save me from a robbery, when your the one who'
s stolen my heart
Don't need you to steer my ship from a glacier, when your the o
ne breaking us apart
I don't need you to come save the day, just save me from your o
wn...

It's a mystery, how no ones figured you out
