Oh...

Where the lights don't stop And the hearts race Everyone don't stop Cause we're in space Come into my city Oh... Come into my city Looks like their gonna be jealous tonight Cause i got a star The nights been waiting for me to take you this far Let's escape Would that be ok?, would that be ok? You ain't got to bring nothing Cause I'll provide it all I know it's new to you But, I'll drive you through it all I got a place Where you can stay So let's take a trip Where the lights don't stop And the hearts race Everyone don't stop Cause we're in space Oh... Come into my city Oh... Come into my city Just relax And let me take away all your pain I was told to make everything in your life ok Everything's just right We got so much time Take a deep breathe It seems like your loosing control But it's ok Cause the feeling is mutual Let me take you there Let me take you there Where the lights don't stop And the hearts race Everyone don't stop Cause we're in space Come into my city Oh... Come into my city Where the lights don't stop And the hearts race Everyone don't stop Cause we're in space Come into my city

Come into my city
