Shaking by herself crying for the pain of her wounds Fear is all she's known for so long

Always lonely
Always down
Stuck in that shit
Blind and scared
Scream out loud
Pain, Misery
Make it known
All around
And free you from this hell

The beatings are not all she is ashamed and alone Dreams are all gone but lies are real

Always lonely
Always down
Stuck in that shit
Blind and scared
Scream out loud
Pain, Misery
Make it known
All around
And free you from this hell

Why should fuckers like you deserve to have a life You don't have a conscience or a heart You are so low Shame of men But you'll burn in hell

Gather your stuff, fly away Yeah fly away
